THE GERMAN SOUTHWEST: Where ideas work.

Baden-Württemberg (BW) is one of the most important economic centres in Europe and one of the leading investment locations on the continent. Our state stands out due to its high productivity and innovativeness. Over 100 excellent non-university research institutions ensure a continuous contribution to cutting-edge technology. About 70 universities create an attractive higher education system.

Alongside the industrial giants, for instance Daimler, Bosch, Porsche and SAP, thousands of small and medium-sized companies drive our economy. Baden-Württemberg enjoys an outstanding reputation and occupies leading positions in industries that traditionally typify the German Southwest, such as mechanical engineering, automotive manufacturing, the healthcare sector and information and communication technologies. As a location of the future, Baden-Württemberg is strong in artificial intelligence, Industry 4.0, lightweight construction and green technology. Our state is international, cosmopolitan and tolerant: people from 184 different countries contribute to our innovativeness and cultural charm.

Allianz Industrie 4.0 Baden-Württemberg

ALLIANZ INDUSTRIE 4.0 BW

Allianz Industrie 4.0 Baden-Württemberg is a network founded and sponsored by Germany's federal state of Baden-Württemberg. Our aim is to pool technological expertise in production as well as IT and communications to provide support for medium-sized industrial companies in their shift towards Industry 4.0. The coordination office is located at VDMA e.V. Baden-Württemberg. Above all, we focus on connecting the involved sectors and fields of technology. In doing so, we can draw on the traditional strengths of our companies: As the „factory suppliers of the world“.
