Dubai International Convention & Exhibition Centre · Zabeel Hall N123
21th – 24th November, 2016
Baden-Württemberg: international, innovative, inviting

Baden-Württemberg is Europe’s most innovative region. From this position, we are intertwined with our neighbouring countries, but also the global economic growth regions, like almost no other region in Europe. The foreign trade figures very clearly reveal our state’s integration into the global economy. In 2015, Baden-Württemberg exported goods to the value of 195 billion euros, a new record figure.

At the same time, demand from Baden-Württemberg contributes to growth and employment worldwide: because the state’s imports too reached a historical record in 2015 with 156 billion euros. Especially local industry is a reliable consumer of products from abroad.

Companies in Baden-Württemberg make a decisive contribution to the creation of global supply chains. They are frequently pioneers for new technologies and global trends. They are therefore sought as partners and courted as investors worldwide. With sustainable products and investments in innovative production technologies, they also belong to the most attractive employers in the world.

But it is not only large companies such as Daimler, Porsche, Bosch or SAP that make up the “global players” in Baden-Württemberg. Many of our medium-sized companies and hidden champions have also been globally active for a long time and – often as the global market leader in their field – very successful. International competition only exists
with new ideas and innovations. Nowhere in Europe do the state and companies invest more in research and development as in Baden-Württemberg.

The Baden-Württemberg Ministry for Economy is a strong partner for companies and their initiatives thanks to numerous funding concepts: whether it be for research or cluster initiatives, technology transfer or new global trends such as digitalisation. This is how we want to promote innovations and future technologies. In all of these areas, we cooperate on an international level and are open to new partnerships. For foreign trade, we also encourage the internationalisation of small and medium-sized companies and support their networking abroad.

New ideas and collaborative projects require an exchange of politics, economy, science and society. Baden-Württemberg therefore actively seeks a direct dialogue with its partners – in your country and your region too, as you can see at this event and in the brochures.

However, the best way is to get to know Baden-Württemberg personally. I would be very pleased to be able to welcome you soon as our guests.

Dr. Nicole Hoffmeister-Kraut MdL

Minister of Economic Affairs, Labour and Housing of the State of Baden-Württemberg
Baden-Württemberg – The German Southwest: Where ideas work.

Baden-Württemberg is one of the most important economic centres in Europe, having become one of the leading investment locations on the continent. Bordering on France, Austria and Switzerland, Baden-Württemberg is situated right at the heart of Europe. Moreover, its outstanding infrastructure makes it an ideal gateway to the markets of the European Union – the world’s economically strongest single market with around 500 million consumers.

In addition to internationally renowned global players such as Daimler, Bosch, SAP, GFT Technologies and Porsche, it is mainly small and medium-sized enterprises that form the backbone of our economy. In 2015, the gross domestic product generated by Baden-Württemberg companies amounted to 460 billion euros, higher than Belgium, Sweden or Austria. What’s more, our federal state is the EU’s top region for innovation. When it comes to its research expenditure, amounting to 4.8 per cent of GDP (2013), Baden-Württemberg also occupies a leading position in Europe. The innovativeness of business and industry is supplemented by a dense network of universities, research institutions and transfer agencies. Many leading German institutions such as the Fraunhofer-Gesellschaft or the Max-Planck-Gesellschaft have substantially more facilities in Baden-Württemberg than in any other state in Germany.

The economic structure of our state is a mixed one. One important mainstay is the mobility sector. Apart from the automotive and aerospace industries, sustainable mobility concepts such as electro-mobility are playing an increasingly important role. Another key sector is mechanical engineering, every third machine made in Germany originates from Baden-Württemberg. Successful companies such as Festo,
Trumpf, Voith and many others were started and have flourished here. Large corporations such as SAP, IBM and Hewlett Packard represent the third main economic segment: information and communication technologies. For the health care sector, the fourth key industry, the conditions in our state are particularly auspicious. Globally important companies such as Aesculap, Paul Hartmann and Karl Storz are at home in Baden-Württemberg.

Environment technology and renewables are our drivers of future economic growth, whereby a quarter of all German environment-specific goods and services are accounted for by enterprises from Baden-Württemberg.

Over 4,000 foreign companies have already decided in favour of Baden-Württemberg. Anyone who invests in the state as a location for their company automatically profits from a growing pool of potential industrial customers, from the highly developed parts-supplier structure, from cooperation with companies that are related or in the same sector, but above all from the know-how and skills of our highly qualified workers. Our state is international, cosmopolitan and tolerant. People from 188 different countries contribute to our innovativeness and cultural charm.

For all questions relating to Baden-Württemberg as a location for science and industry, Baden-Württemberg International (bw-i) is your first point of contact. Go to www.bw-invest.de to find details of the opportunities for cooperation and investment that abound in Baden-Württemberg!
One region. 1000 strengths.

Area
35,741 km² – approx. 10% of Germany

Inhabitants
10.7 million – approx. 13% of Germany

Urban centres
Stuttgart, Karlsruhe, Mannheim, Freiburg, Heidelberg, Heilbronn, Ulm, Pforzheim, Reutlingen

The economy
• Gross domestic product (GDP): 460 billion Euros – 15.2% of German GDP
• GDP per inhabitant: 42,745 Euros
• Exports: 195 billion Euros
• Export volume/inhabitant: 18,075 Euros
• Research and development spending (in 2013): 4.8% of GDP (German average: 2.8%)

Leading sectors
• Engineering: 30.2% of total German mechanical engineering industry
• Automotive industry: with almost one third of turnover generated by the whole sector and around 40 per cent of the automotive workforce in Germany Baden-Württemberg is the German “car state”
• Medical technology/measuring and control systems/optics: Baden-Württemberg is market leader in the export of medical technology
• Health care
• Life sciences
• ICT industry
• Research & development: Baden-Württemberg is Europe’s number one in innovation
• Aerospace industry: Baden-Württemberg is one of the most important locations for the European aerospace industry
• Environmental technology and renewables

Data for 2015
Baden-Württemberg International (bw-i) is the competence centre of the State of Baden-Württemberg (Germany) for the internationalisation, promotion and development of business, science and research. We lend support to domestic and foreign companies, clusters and networks, research institutions and universities by serving as the central first point-of-contact in all questions relating to internationalisation.

Our main objectives are:

- Strengthening contacts between foreign and local companies, universities and research institutions
- Supporting the endeavours of Baden-Württemberg companies, universities and research institutions to enter foreign markets
- Positioning Baden-Württemberg as an excellent location for business and science

Our support services include:

- Provision of general information on Baden-Württemberg as a location for business and science, as well as specific location and structural data
- Supply of general information on the legal framework and social insurance
- Identification of suitable business and scientific partners for your company
- Identification of potential sites and organisation of site visits in cooperation with regional and local business-promotion agencies
- Support with administrative procedures
- Gateway to all actors in the field of business promotion and development, such as technology-oriented industrial institutions and sector-specific networks
